DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-4, 6-11, 13-14 and 16-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 1, applicant should clarify the structure/arrangement of the first and second magnetic layers relative to the one or more trenches intended by the language “defining a path *along the one or more trenches parallel to the signal path.*” There is no antecedent basis for “the signal path of the first conductor” or “the signal path of the second conductor.” Claims 2-4 and 6-7 inherit the defect of the parent claim.

Regarding claim 8, applicant should clarify the structure/arrangement of the first and second magnetic layers relative to the one or more trenches intended by the language “defining a path *along the one or more trenches.*” Applicant should also clarify the arrangement/structure of the first and second magnetic layers relative to the first and second conductors. Claims 9-11, 13-14 and 16-17 inherit the defect of the parent claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 2832

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 and 7, as best understood in view of the rejection under 35 USC 112 second paragraph, are rejected under 35 U.S.C. 102(b) as being anticipated by Mino et al. [JP 06124-843].

Mino et al. discloses a planar transformer [figures 4a-b] comprising :

- a substrate [20] ;
- an insulation structure [21, 23, 26] disposed over the substrate and includes one or more trenches/cavities/grooves];
- first and second inductors/conductors/coils [24, 25] defining a path along the one or more trenches/cavities/grooves; and
- first and second magnetic layers [22, 27] being coupled and defining a path along the one or more trenches/cavities/grooves parallel to the signal path of the first and second conductors, respectively.

wherein the first and second inductors/conductors/coils are positioned side-by-side.

Regarding claims 2-3 and 7, Mino et al. discloses the first inductor/conductor/coil comprises one or more legs and the second inductor/conductor/coil comprises one or more leg wherein at least a portion of at least one leg of the second inductor/conductor/coil positioned between two adjacent legs of the first inductor/conductor/coil.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 2832

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Mino et al. in view of Fujino et al. [US 6,067,002].

Mino et al. discloses the instant claimed invention except for the specific material for the magnetic layers.

Fujino et al. discloses the use of amorphous cobalt alloy for magnetic layer in an induction device.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to use amorphous cobalt alloy for the magnetic layers of Mino et al., as suggested by Fujino et al., for the purpose of providing a stable quality circuit substrate.

Allowable Subject Matter

Claim 8 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

Claims 9-11, 13-14 and 16-17 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments with respect to claims 1-4, 6-11, 13-14 and 16-17 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
